SUBJECT WANDSWORTH RD: REMEDIAL WORKS OUTSIDE FRONTAGES

Dear Sir/ Madam

I am writing to inform you that works are planned outside your shops during the month of August by the contractor who carried out the construction works two years ago. These planned works will be carried out at various locations along the main road, and some will be outside local shops, which will require the suspension of existing parking bays. The works include resolving issues such as drainage, defective road surfacing and white lining. It is expected that the localised works will not take longer than 3 days. This is part of the contractor's maintenance programme for the scheme addressing defective works. It is planned to start work on the 4th August for approximately 3-4 weeks and some works will involve road closures at junctions and carried out at night between 0930pm and 0530 hrs. The areas outside some of the local shops will be done during the day. This programme of works will also require the signal pedestrian crossing between Courland St and Union Grove to be switched off. During the month of August the junction of Wandsworth Rd / Union Grove, and Wandsworth Rd / Silverthorne Rd will be closed for works at night. The main road will be kept open. Finally, the road marking along the main road will also be done as part of this programme. I hope this last batch of works will not cause too much inconvenience. I have already informed all the ward councillors with regard to this planned works.

Yours faithfully

Abu Barkatoolah
Head of Transport Planning and Strategy
